

Mobile App Wireframing Report

Smart Study Planner Pro

1. Introduction

The objective of this project is to design low-fidelity wireframes for a mobile application. The application, named **Smart Study Planner Pro**, is developed to help students effectively manage their academic tasks, deadlines, and productivity using structured planning techniques.

This wireframing focuses on the early-stage design process, emphasizing layout, usability, and user flow rather than visual styling.

2. App Idea

Smart Study Planner Pro is a mobile application designed to assist students in organizing their study schedules, tracking tasks, and improving productivity.

The app integrates:

- Task management system
 - Pomodoro timer for focused study sessions
 - Eisenhower Matrix for prioritization
 - Progress tracking and profile management
-

3. User Research

Basic user research was conducted to understand student needs:

- Students often forget assignment deadlines
 - They struggle with time management
 - They find it difficult to prioritize tasks
 - They need a simple and structured tool for productivity
-

4. User Persona

Name: John Doe

Age: 19

Occupation: College Student

Goals:

- Complete assignments on time
- Stay organized
- Improve productivity

Problems:

- Forgets deadlines
 - Gets overwhelmed with multiple tasks
 - Lacks proper planning system
-

5. User Flow

The basic user flow of the application is:

Login → Dashboard → Add Task → View Task List → Start Pomodoro Timer → Track Progress → Manage Profile

6. Design Approach

The wireframes are designed as **low-fidelity**, focusing on:

- Simple layout using boxes and placeholders
- Clear navigation between screens
- Logical arrangement of elements
- No use of colors or styling

The goal is to visualize structure and functionality rather than final UI design.

7. Wireframe Screens

7.1 Login Screen

- Allows user to log in using credentials
- Simple input fields and login button

7.2 Dashboard

- Displays today's tasks
- Shows progress overview
- Provides quick access to features like Add Task and Pomodoro

7.3 Task List Screen

- Displays all tasks
- Includes checkboxes to mark completion
- Shows deadlines and priorities

Task List

☐ Complete Math Assignment

☐ Review Chemistry Notes

☒ Physics Project

☐ History Essay

Profile

7.5 Pomodoro Timer Screen

- Displays a countdown timer
- Helps users focus using time-based sessions
- Includes start/pause functionality (conceptual)

7.6 Eisenhower Matrix Screen

- Divides tasks into four categories:
 - Important & Urgent
 - Important & Not Urgent
 - Not Important & Urgent
 - Not Important & Not Urgent

7.7 Profile Screen

- Displays user information
- Shows productivity statistics
- Tracks completed tasks

8. Design Thinking

The design decisions are based on improving student productivity:

- **Task List:** Helps organize work clearly
 - **Pomodoro Timer:** Improves focus and reduces distractions
 - **Eisenhower Matrix:** Helps prioritize tasks effectively
 - **Dashboard:** Provides a quick overview of progress
 - **Profile Page:** Encourages motivation through tracking
-

9. Conclusion

The Smart Study Planner Pro wireframes successfully demonstrate the structure and functionality of a student productivity application. The design focuses on usability, simplicity, and logical flow, making it easy for users to manage tasks efficiently.

This project highlights the importance of early-stage wireframing in application development.
